SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new collection of information.

The objective of the survey will be to understand divers' and snorkelers' expenditures associated with recreational coral reef diving activities in South Florida. The survey will also collect information on divers' attitudes, preferences, and concerns about recreational diving and coral reefs health in South Florida. We are conducting this survey to improve our understanding of divers' expenditure patterns and to estimate the economic impact of coral reef related spending. Results of the survey will be used to inform coastal resource management planning and establish a baseline for outreach and education. The expenditure survey is also expected to provide useful information for local economic and business interests.
